

2020 ESG Global Summit: The Road to Resilient Economy and Sustainable Finance

- 2020. 11. 09(Mon) 08:30 – 17:00
- Grand Ballroom(1F), Westin Chosun Hotel, Seoul, Korea

Invitation

The ongoing Covid-19 pandemic, the most devastating since the Great Depression, is set to drive fundamental reforms of the global socioeconomic paradigm and international architecture for years to come. There is an increasing call for a reinvention towards more sustainable and inclusive capitalism. Aside from the accelerating trend of de-globalization and digitalization, ESG (abbreviation for environmental, social, governance) has emerged as a key facilitator to promote transition towards more sustainable investment and growth in the post-Covid age.

Against this backdrop, the Conference is intended to discuss a broad range of interrelated topics, including: (i) the world after the Covid-19: reshaping of capitalism and global governance, (ii) emerging trends and issues for ESG investing: improving corporate governance and social responsibility, (iii) key post-Covid agenda for financial services industries: mainstreaming of ESG management and strengthening digital finance, and, (iv) coping with climate change for sustainable growth: implications for government policy and business strategy.

The Conference is set for November 9th, 2020 at Westin Chosun Hotel in Seoul. As the attached program shows, key speakers for the Conference include global leaders and senior government officials in Korea. International experts from academia, journalism, international organizations and investment business enterprises are also scheduled to join the Conference as speakers or panelists (with overseas participation via online/video).

I hope you will be able to join us at the Conference.

Thank you.

October 2020

Jun Kwang-woo

Chairman
Institute for Global Economics
