The IGE cordially invites you to a webinar featuring Peter Dillard, Global Head of Investment Engineering at DFA. DFA is a pioneer in data-driven quantitative investing and a premier global asset manager with over \$1 trillion in AUM. Drawing on DFA's scientific investment approach, backed by Nobel Laureate advisors like Eugene Fama and Robert C. Merton, this forum will offer in-depth discussions on how AI-driven investing can provide solutions in a dynamic global equity market where unprecedented opportunities and the risks of hyper-volatility coexist. We look forward to your participation.
